Education

Information Systems and Technologies (in public health)

2018 - 2022

International Sakharov Environmental
Institute of Belarusian State University

Additional Education

Udemy – Web developer 2021 course

March 2021 - May 2021, [certificate](#)

- Using HTML5 and CSS3 in real projects
- JavaScript and jQuery basics
- Git, GitHub
- Bootstrap, FlexBox
- CSS Grid
- Responsive web design

Career Goals

I plan to master a framework in the next 2 - 3 months and also aim to become a full stack developer in the future.

Experience

Udemy – Web developer 2021 course

Mastered how to use modern web development technologies for building responsive websites and developed several real projects.

Projects

My portfolio

Designed and coded my personal website using HTML, CSS and JavaScript. Responsive design, dark/light themes and animations made it dynamic and user friendly.

Heart rate monitors store

Store has a catalog where a user can make an order by filling a form Using SCSS, jQuery plugins, Gulp, form validation.

Todo List app

My very first simple React app. Saves list to localStorage, so that data is not lost when the page refreshes
