

Larisa Yushkevich

FRONTEND DEVELOPER

Skills Summary

Languages:

- HTML5
- CSS3
- JavaScript

Libraries/Frameworks:

- SASS/SCSS
- React (basic)
- SAPUI5

Tools:

- Git/GitHub
- npm
- Figma, Avocode

Other skills:

- Responsive Design
- SQL basics
- OOP principles

English Level

B1 (Intermediate)

Education

Information Systems and Technologies (in public health)

2018 - 2022

International Sakharov Environmental
Institute of Belarusian State University

Additional Education

Udemy – Web developer 2021 course

March 2021 - May 2021, [certificate](#)

- Using HTML5 and CSS3 in real projects
- JavaScript and jQuery basics
- Git, GitHub
- Bootstrap, FlexBox, Grid
- Responsive web design

LeverX – Front-end Development with the SAPUI5 Framework course

31.08.2021 - 23.09.2021, [certificate](#)

- JS concepts: lexical environment, scope, closure, HTTP, AJAX, inheritance, async code, promises
- SAPUI5 framework basics: controls, models, data binding, OData protocol, MVC paradigm
- ODataModel CRUD operations

Career Goals

I want to try different frameworks in practice to find what I like best and then become a highly qualified Frontend Developer. Also I aim to become a Full Stack Developer in the future by learning a modern back-end stack.

Work Experience

BIVIAR Partners – Junior Frontend Developer (SAPUI5)

October 2021 - present

Developed SPAs with SAPUI5 framework based on MVC architecture (SAP HCM module).

Projects

My Portfolio

Designed and coded my personal website using HTML, CSS and JavaScript. Responsive design, dark/light themes and animations made it dynamic and fascinating.

Heart Rate Monitors Store

Store has a catalog where a user can make an order by filling a form (with validation). SCSS, jQuery plugins, Gulp were used.

To Do List App

My very first simple React app. Saves a list to localStorage, so that data is not lost when the page refreshes.

Weather App

Vanilla JS application developed using OpenWeatherMap API. Shows both Celsius and Fahrenheit degrees, icon that illustrates the weather and short description of current forecast.
